Experience To Get The Job Done

Our range of expertise encompasses the full range of electronic and electrical systems. This enables us to plan and design comprehensively to ensure the utmost in performance, simplicity and safety.

By doing up front design, documentation, and engineering, we provide a “Road-Map” of where we started and where we are going, which ultimately makes any project more efficient.

From needs analysis to design, engineering, project management, installation, programming & graphic design, and 24/7/365 service, Performance Imaging offers a “One-Stop Shopping” solution to service all of our clients needs.

ELEVATE YOUR LIFESTYLE THROUGH INTUITIVE CONTROL

We believe marine grade craftsmanship and execution should go into every detail of your property's integration project from start to finish. It's all in the details.

With the aid of CAD software, we develop flow diagrams and detailed layouts for the system and wiring. We consider all of the details, from the size of the room and the proper seating arrangements to the selection of audio and video equipment, room lighting, HVAC, power and safety requirements. Once the design is complete, we review it with you to verify it meets your expectations and the needs of each member of your project team. Whether you are building a new home or adding electronics to a completed one, we ensure the highest

level of craftsmanship. We are expert installers. Our installation crew is regularly trained and nationally certified by the most respected industry organizations. Each step of your installation is reviewed by a Performance Imaging project manager. All programming and interface design is done by our certified in-house specialists to ensure flawless operation, ease of use and timeless design. Your equipment is installed by our engineers with the utmost consideration for you, your decoration and your convenience.

SEAMLESS INTEGRATION

Entertainment Anywhere. Walk into a room, touch a button on a wall-mounted touchscreen and your choice of music from virtually any source starts playing.

Spotify, Pandora, XM, iHeartRadio, Soundcloud, it's like having a personalized music butler in every room. You can even hear different musical selections in different areas of your home simultaneously. Indoors, outdoors, in the shower or the driveway, tell us what you want and it's done. It will be carefully planned with performance, appearance and craftsmanship in mind.

Our in-house engineers and designers will systematically architect all the electronic components considering the design aesthetics and the environment they live in, all seamlessly presented to enhance the ease of use.

INTEGRATION WITHOUT INTRUSION

ADVANCED ELECTRONIC DESIGN | INVISIBLE SPEAKERS & OUTLETS | REVOLUTIONARY LED LIGHTING | MARINE GRADE CRAFTSMANSHIP
PRIVATE THEATERS & IMAX | ACOUSTIC ISOLATION | LIGHTING CONTROL | CLIMATE CONTROL | MOTORIZED WINDOW SHADES
WHOLE PROPERTY CONNECTIVITY | TELEPHONE & INTERCOM | CLOSED CIRCUIT TV CAMERAS | KEY-LESS ENTRY | POWER CONDITIONING
LIGHTNING PROTECTION | MOTORIZED WINDOW SHADES | WIRED & WIRELESS NETWORKS | 24/7/365 WORLDWIDE SERVICE

TAILORED TO MEET YOUR INDIVIDUAL REQUIREMENTS

Climate Control. Window Automation.

LED Lighting Control. Simplify your lifestyle through the comfort and convenience of automation.

Our Climate Control Systems work together with our Natural Light Control window treatments to manage sunlight and radiant heat.

Silent, motorized window shades are programmed to automatically regulate the amount of sunlight coming through any window, controlling both glare and brightness, and keeping harmful solar rays off your carpeting, furniture, valuable artwork and antiques.

Our systems monitor the status of each room to maximize your energy efficiency. Solutions for your entire home. Properly designed climate and shade control systems are required to ensure the comfort and efficiency of any

home. This is especially true for homes with many large or tall windows or with large open spaces.

Your climate wishes are programmed into each area of the home, based on your usage. The system saves you money by programming your daily patterns into the system control. Entertaining areas of your home are set to moderate temperatures to minimize energy when not in use.

All of the control is performed automatically, simply and quietly. Staying green has never been easier with our endless energy saving solutions for your entire home.

It's been said that if your home was compared to a Picasso, your art, furniture and decor would be the canvas, the lighting fixtures and the type of light you use would be the colors of paint, and the way you control that light would be the brushstrokes. A masterpiece is defined by all three elements. We are experts in brush-strokes. We design systems that provide just the right amount of light for the event or task at hand. Imagine a wall-mounted keypad in your kitchen. Each button is engraved with various lighting scenarios: "Day", "Night", "Entertain", and "Off". The single touch of "Night" brings the path lights up just to a level where sleep eyes can see without blinding you with light.

AN ENTERTAINMENT EXPERIENCE UNLIKE ANY OTHER

Enjoy the world's most premium and immerse entertainment experience from the luxury of your home.

Imagine being able to experience all your favorite movies, television, sports, music and gaming in IMAX.

Modelled after IMAX's state-of-the-art private screening room in Santa Monica where leading filmmakers such as Christopher Nolan, James Cameron and JJ Abrams come to review their

films in IMAX for the first time, the IMAX Private Theatre sets a new benchmark for the ultra-premium home theatre market, delivering a truly exclusive and complete end-to-end experience designed for the ultimate home.

Beyond IMAX, we also offer Private Theaters and Media Rooms built specifically for your residence. A Private Theater is a wonderful way to relax with your family without the hassle of a trip to the multiplex. Our Private Theater designs let you experience what the movie's director intended.

It doesn't just stop at movies. From major sporting events to concerts and enjoying the latest next generation of gaming in awe-inspiring 4k Resolution, a Media Room / Private Theater takes any entertainment to the next level. Why settle for less.

IMAX Private Theatre™
Certified Technology Partner

Performance Imaging takes your dreams from design, to construction techniques, to the installation of the finest equipment available.

We provide custom cabinetry, acoustical treatments, automated draperies, lighting control, theater seating, interior design, theater theme art and even the traditional popcorn maker and of course, all the audio and video.

The perfect image, the perfect sound, the perfect environment for years to come. Available in the comfort and convenience of your own home.

FULL CONNECTIVITY & PEACE OF MIND

With our state of the art Wired & Wireless whole property connectivity, the world is now as close as your home or office. Right at your fingertips.

As one of the world's leading systems integration companies. Our experienced designers, technicians, acoustical consultants, and craftspeople combine the best of the latest digital technology with old world care.

From concept to implementation, we integrate complexity into amazing. Whether you are building a new home or adding electronics to an existing build, we ensure the highest level of craftsmanship.

As a full service technology provider, we take responsibility and encompass all aspects of system design, project management, installation & service. Whenever you need us, we'll be there.

PI Network Technology uses Enterprise quality components built from the ground up to ensure high performance and reliability. In fact, with our unique Network Operations Center, we monitor your network remotely. That enables us to handle the majority of all service required without ever dispatching a technician to your home.

We know that your network is used most from 5pm to 8am weekdays and on weekends. That's why we're staffed during these hours. If we do have to send a technician to your home, they'll be your personal technician who knows you and your system.
